

# Preannouncement of EuroMarine 2019 calls

06/03/2019

The terms of EuroMarine 2019 calls were specified by the Steering Committee (SC) during its 31 Jan. 2019 meeting. These **terms are outlined below, in advance of the actual launch of the call, with the purpose of letting scientists at EuroMarine member organisations start preparing applications and liaise with potential EuroMarine partners.**

**In 2019, as in 2018, two distinct calls will be organised.** The final budget of the calls will be determined by the SC at a later stage based on EuroMarine final 2019 resources.

## Call for proposals for FWS and WG

The eligible categories of activities that will be funded in 2019 include:

- **Foresight Workshops** ('horizon scanning', FWS) – maximum funding: 7,500 €
- **EuroMarine Working Groups** (WG) addressing strategic services or issues – maximum funding: 5,000 €

To be eligible:

- **FWS proposals** should have a real **foresight dimension** and target a **publication**. While the call is **open to any topics**, the Steering Committee would welcome proposals **addressing EuroMarine priorities**, as defined in EuroMarine's 2018 publication [Ocean Frontiers for Sustainable Development Manifesto](#)
- **WG proposals** should reinforce the network and advance its strategy.

Proposals should involve **at least three 2019 Full (paying) Member Organisations of EuroMarine, from at least two different countries**. (Please refer to the provisional [2019 membership list](#) and the corresponding [list of General Assembly representatives](#), both attached to the present announcement, and do not hesitate to contact [secretariat@euromarinetwork.eu](mailto:secretariat@euromarinetwork.eu) for any contact information).

Activities should preferably be carried out in 2020 and any exemption should be justified in the proposal.

The two sets of proposals corresponding to the above two categories will be reviewed separately using specific criteria and specific pools of EuroMarine referees. The EuroMarine Steering Committee will make final decisions.

Pending the 2019 call launch, please refer for further information to the [previous \(2018\) call webpage](#) (notably to the text of the call and the terms and conditions of funding).

### Timeline:

- **2 April: Publication of the call**
- **31 May: Deadline for FWS and WG proposal submission**
- 1 June - 1 Sept.: Review process
- Oct.-Nov. (depending on the scheduling of the SC meeting during which final decisions will be made): Notification of the results to applicants

## Call for applications for individual fellowships to participate in advanced courses

In 2019 as in 2018 and 2017, instead of directly funding Capacity Building and Training activities, EuroMarine will grant **individual fellowships to let EuroMarine PhD students and scholars in their first post-doctoral position attend an advanced course of their choice.**

- **Individual fellowships** (500 €; PhD students and scholars in their first post-doctorate)

Applicants must either belong to a EuroMarine Full Member Organisation or to one of EuroMarine Invited Member Organisations in Morocco, Peru, South Africa, Tunisia, or Turkey (please refer to the attached [membership list](#)).

The courses targeted by the applicants must run and be completed between 1 June and 30 November 2019.

Proposals will be assessed by the EuroMarine [Young Scientist Working Group](#) (YSWG), which was funded under a previous EuroMarine call and which is managed by AquaTT. Funding will be subject to official acceptance onto the course, and will be granted by EuroMarine through AquaTT.

### Timeline:

- 2 April 2019: Call opens
- 26 April 2019: **Deadline for submissions**
- 15 May 2019: Results announced
